

Introducing itsWritten: The AI-Powered Private Journal for Deep Reflection

In a world where mental health awareness is at an all-time high, itsWritten emerges as a groundbreaking app designed to revolutionize personal journaling. This innovative platform empowers users to write freely, capturing thoughts and emotions in a serene, private space, while seamlessly integrating Apple Intelligence for personalized support.

Key Features

- **Focused Journaling Interface:** Capture thoughts and emotions with a clean, distraction-free writing space that prioritizes personal reflection over productivity.
- **Apple Intelligence Integration:** Continuously engage with empathetic reflections and follow-up prompts, adapting to your writing style and pace.
- **Secure Chat Functionality:** Save and revisit conversations with built-in history, ensuring sensitive content remains private and protected.
- **Privacy-First Design:** Protect sensitive content with privacy-sensitive UI protections, offering peace of mind for users sharing personal insights.
- **Research-Backed Support:** Access PubMed-backed sources within the chat flow for evidence-based insights on health and biomedical topics, when appropriate.

Availability

Available now for free on iOS devices. Stay tuned for further updates and platform expansions.

Download on the App Store: <https://apps.apple.com/app/id6757445119>

About the Developer

Filippo Cilia is an indie creator working on small, focused software products. They build

consistently and improve with each project, and try to build things that last. Filippo's latest app is itsWritten, which was released on February 27, 2026.
